

I believe Connie has developed the most valuable tool I use in home educating my children. The Home Schooling Lesson Planner and Student Records has saved me many lost minutes, even hours of time organizing and presenting my lessons each day. In just 15 to 20 minutes I can outline my school day, writing down on the day planner sheet what is to be done in the subjects to be covered the next day\week. The greatest time savings come when I start my school day. Like a map, the Lesson Planner day sheet [put in a plastic cover] moves along with me showing me the route to take. It is my daily action plan "mapped"out. As I accomplish each item, teach each "subject" and complete each directive, I can tick the item box and feel confident at 3:00 that all has been accomplished (knowing that if something was left out it was by my choice, not due to bad memory, and it can easily be rescheduled for the next day, and not forgotten totally!) Confidence is also gained in knowing a complete record of my children's activities, learning and development has been compiled--all on one page! I cannot believe all the time and effort I once had to put into lesson planning and recording! My life has been made a lot easier and I enjoy using this planner. It really works for me!

Sincerely,

Mrs. Rose Standish
